

## Sustainability at Imperial Wharf

As part of creating exciting new living and working environments in London , St George Plc is committed to the delivery of sustainable development ensuring a balance between environmental, economic and social objectives.

*"St George is a leading developer seeking to improve the quality of the environment in the capital."*

Chris Birks, Regional Director, [Environment Agency](#) .

At Imperial Wharf a range of initiatives have been implemented to create a sustainable development for the 21st Century. These include:

- Enhanced recycling facilities for residents and commercial operators with recycling centres easily accessible to all occupiers.
- Public spaces designed to be accessible by all and evaluated by the Centre for Accessible Environments and the Joint Mobility Unit.
- Provision of extensive open space designed to enhance the ecology and environment.
- Enhancements to public transport facilities with contributions to extended local bus services and it's new rail station.
- Enhancements to education facilities in the local area.
- Measurement and monitoring of key performance indicators in line with the Government's rethinking construction programme.

All of these initiatives are devised to build upon a master plan designed with sustainability in mind with the opportunity to live, work and take leisure within a single environment.
